

If you have automatic resume parsing enabled, occasionally you may need to review your parsing results to troubleshoot issues. You access your parsing results from the Bullhorn menu, under Tools.

**Parsing Results:**

Selected User: BH Training Auto Parsing

View messages sent to a specific resume parsing address (if your company has more than one).

Filter results by parsing status:

- **Successful:** Resume has been parsed and the candidate was added to Bullhorn.
- **In Progress:** Parser is currently attempting to parse the resume.
- **Pending:** Resume has been received and is queued for parsing.
- **Unsuccessful:** Bullhorn was unable to parse the resume.

Search for a specific email by Subject, Recipient, or Sender.

Bullhorn's automatic resume parser processes incoming resumes into candidate records in real-time. When the Automatic Resume Parser creates a candidate record, the record is owned by the user associated with the resume parsing address, usually the Unassigned account (a placeholder account that is not associated with any specific individual). In addition, the candidate record status is New Lead. The Automatic Resume Parser attempts to extract the following fields from an incoming resume:

- Name
- Current Company
- Job Title
- Email 1
- Home Phone, Work Phone, Cell Phone - The parser adds a country code before the phone number.
- Address
- Category (tries to exactly match the job title to a category)
- Skills
- Professional Overview/Resume
- Education
- Work History
